

COAI Press Statement on Sharing of Infrastructure:

“We welcome the amendment in License Conditions further enhancing sharing of active infrastructure between telecom operators. It was our long pending ask. At present, active infrastructure sharing was allowed to TSPs only for antenna, feeder cable, Node B and transmission systems. The allowing of sharing of core network elements such as MSC, HLR, IN etc. among the TSPs will reduce the cost for the TSPs and facilitate faster rollout of services. This is a very progressive step which will go a long way in enhancing digital connectivity in India.”

To be attributed Lt. Gen. Dr. SP Kochhar, DG, COAI.
