

COAI press statement on launch of project Gati Shakti:

“We would like to congratulate and applaud the Government of India for the launch of the country’s ambitious project Gati Shakti, a multi-modal connectivity plan which is aimed to expedite the infrastructural project implementation, thereby accelerating economic growth. The vision for this plan is to use data from 16 different ministries and put this on the digital platform made by BISAG-N. On the roadmap to build a digitally connected country, digitization and digital technologies enabled by resilient wireline and wireless broadband connectivity will be a cornerstone for the work to be done under the ambitious Gati Shakti. We are happy to align ourselves with the objective of this project to coordinate and integrate planning and execution of national infrastructure projects.”
